

MAKING THE WORK PLACE A BETTER PLACE

CTS2PC

Flight Line Series

Built To Perform

Champion Tool Storage Flightline Series was designed to provide Aircraft Technicians with a more robust tool storage solution that is easily transported from hangar to hanger. Our 16" and 20" pneumatic wheels allow the unit to easily roll over cords, large cracks in concrete and asphalt, and even over lumber and debris. Proudly made in the USA, the Flightline Series is also built to withstand the harsh conditions of the job site and to protect the tools you use every day. Our units are constructed with thick gauge welded steel housings, steel drawers, ball-bearing drawer slides, and powder coated finishes. These boxes can tolerate heavy handling and transportation using aircraft tow tugs and tractors . They allow secure storage for technician tools without having to empty the cart at night. The heavy-duty Flightline Series is flexible and maneuverable, making transport of tools and parts fast and easy. No other tool box on the market with casters can provide the versatility the Flightline Series provides. This is the ultimate aviation service solution! Call us for a quote today.

Complete work space solutions
